IN THE CLAIMS

This is a complete and current listing of the claims, marked with status identifiers in parentheses. The following listing of claims will replace all prior versions and listings of claims in the application.

1. (Currently Amended) A method for ~~carrying out~~ a clinical study ~~(2) on~~ involving a patient ~~(4)~~, comprising:
   ~~wherein~~ storing at least one of study-related and ~~or~~ patient-related data ~~(14, 16)~~, ~~which can be~~ to be read out ~~(27)~~ by a non-study doctor ~~(22)~~ assigned to the patient ~~(4)~~, ~~are stored (13, 29)~~ in a memory ~~(12)~~ during the clinical study ~~(2)~~.

2. (Currently Amended) The method as claimed in claim 1, wherein the data ~~(14, 16)~~ are stored ~~(13)~~ in the memory ~~(12)~~ by a study doctor ~~(8)~~.

3. (Currently Amended) The method as claimed in claim 1 ~~or 2~~, wherein the non-study doctor ~~(22)~~ reads ~~(27)~~ the data ~~(14, 16)~~ out from the memory ~~(12)~~ before an interaction ~~(28)~~ with the patient ~~(4)~~.

4. (Currently Amended) The method as claimed in ~~one of the preceding claims~~ claim 1, wherein the data ~~(14, 16)~~ are stored ~~(13, 29)~~ in the memory ~~(12)~~ with standardized structuring ~~(18, 20)~~.

5. (Currently Amended) The method as claimed in claim 1, ~~one of the preceding claims,~~ wherein clear instructions to the non-study doctor ~~(22)~~ are stored ~~(29)~~ as data ~~(14, 16)~~.

New PCT National Phase Application
Docket No. 32860-001073/US

6.   (Currently Amended) The method as claimed in <u>claim 1</u>~~one of the preceding claims~~, wherein the data ~~(14, 16)~~ are assigned to various classes ~~(30, 32)~~, and the non-study doctor ~~(22)~~ reads ~~(27)~~ only information of one class ~~(30, 32)~~ out from the memory ~~(12)~~.

7.   (Currently Amended) An information system for a clinical study ~~(2)~~ on a patient ~~(4)~~, ~~having~~ <u>comprising</u>:
_____ a memory ~~(12)~~ assigned to the patient ~~(4)~~ for <u>at least one of</u> study-<u>related and</u> ~~or~~ patient-related data ~~(14, 16)~~<u>;</u> <u>and</u>
_____ ~~having~~ a data input device ~~(15)~~ for storing data ~~(14, 16)~~ in the memory ~~(12)~~<u>;</u> and
_____ ~~having~~ a data reading device<u>,</u> ~~(25)~~ accessible by a non-study doctor ~~(22)~~ assigned to the patient<u>,</u> ~~(4)~~ for reading the data ~~(14, 16)~~ out from the memory ~~(12)~~.

8.   (Currently Amended) The information system as claimed in claim 7, wherein ~~the patient (4) can carry~~ the memory <u>is portable</u>~~(12) with them~~.

9.   (Currently Amended) The information system as claimed in claim 7, wherein the memory ~~(12)~~ is part of a data network<u>,</u> to which data input and output devices ~~(15, 25) can be connected~~<u>are connectable</u> and <u>wherein</u> authorization~~, which the patient (4) can carry with them,~~ is required for access to the data ~~(13, 27, 29)~~.

10.   (Currently Amended) The information system as claimed in ~~one of claims 7 to 9~~<u>claim 7</u>, wherein ~~the patient (4) can carry~~ the data reading device <u>is portable</u>~~(25) with them~~.

11.   (New)   The method as claimed in claim 2, wherein the non-study doctor reads the data out from the memory before an interaction with the patient.

12. (New) The method as claimed in claim 2, wherein the data are stored in the memory with standardized structuring.

13. (New) The method as claimed in claim 2, wherein clear instructions to the non-study doctor are stored as data.

14. (New) The method as claimed in claim 2, wherein the data are assigned to various classes, and the non-study doctor reads only information of one class out from the memory.

15. (New) The information system as claimed in claim 8, wherein the data reading device is portable.

16. (New) The information system as claimed in claim 9, wherein the data reading device is portable.

17. (New) An information system for a clinical study on a patient, comprising:
    memory means, assigned to the patient, for at least one of study-related and patient-related data;
    input means for storing data in the memory means; and
    reading means, accessible by a non-study doctor assigned to the patient, for reading the data out from the memory means.

18. (New) The information system as claimed in claim 17, wherein the memory means is portable.

19. (New) The information system as claimed in claim 17, wherein the memory means is part of a data network, to which data input and output devices are connectable and wherein authorization is required for access to the data.

20. (New)   The information system as claimed in claim 17, wherein the reading means is portable.
